

Reduce the Risk and Manage the Cost of Discovery with a Trusted, Experienced Partner

Discovery can be costly, complex and unpredictable due to the ever-increasing volume of digital communication. Legal professionals have never been more challenged to effectively preserve, collect, process, host, review and produce discovery-related information. Without the experienced people and technical resources required to meet these challenges, legal teams can experience issues that jeopardize cases. Some of these include: missing or overlooked case files; unexpected delays in processing data; legal sanctions; unanticipated document processing costs; not properly identifying documents for legal hold; ineffective budgeting and project planning, and more.

To be successful, attorneys need to feel confident that they can confront these constantly shifting challenges. This is where Canon Discovery Services comes in!

WHY CHOOSE CANON

Canon Discovery Services specializes in solving complex discovery problems by helping to mitigate the cost, and managing litigation risk. We help mid-size and large firms, as well as in-house counsel improve their ability to control, predict and hold down the costs associated with discovery. We have been helping firms achieve these goals for over thirty years.

Our experts have held leadership roles in top-tier electronic discovery companies and performed litigation support at Am Law 50 firms. We have also constructed centralized evidence response systems for Fortune 100 companies and have been innovators and thought leaders on discovery issues.

Canon Discovery Services provides you with a single-source solution throughout the entire litigation process.

Canon Discovery Services provides a wide range of services to be an effective extension of your legal team:

-  **Discovery Consulting**
-  **Forensics and Collections**
-  **Processing and hosting (the right technology for the situation)**
-  **Paper discovery needs (scanning and coding)**
-  **Review Consulting and Managed Review**

YOUR TRUSTED PARTNER AND END-TO-END SOLUTION PROVIDER FOR DISCOVERY

Canon Discovery Services enables your legal team to find critical documents faster. This can translate into more effectively meeting deadlines and containing discovery costs. For example, we collaborated with an Am Law 100 client to implement a more effective document review methodology; an improved global data collection strategy; and efficient solutions for managing a sudden change in a production deadline. These approaches helped the firm and its client minimize the risks associated with the eDiscovery process, and deliver responsive data accurately and on schedule.

Based on our experience, we can help your legal teams solve similar challenges so they can stay more focused on winning cases. How? By leveraging our flexible, integrated portfolio of discovery and litigation support services, as well as technology solutions. Examples include:

- **Discovery Consulting**
- **Managed review services**
- **Project management**
- **Early case assessment**
- **Legal holds and preservation**
- **eDiscovery processing**
- **Paper discovery**
- **Hosted review**
- **Data collection**
- **Production services**

Our solutions are tailored to each client, scalable, and incorporate our technology platforms.
